

INDEPENDENT AUDITOR'S REPORT

To the Members of Nuvama Wealth and Investment Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Nuvama Wealth and Investment Limited ("the Company"), which comprise the Balance sheet as at March 31 2025, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of material accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, its profit including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the financial year ended March 31, 2025. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key audit matters	How our audit addressed the key audit matter
IT Systems and Controls The financial accounting and reporting systems of the Company are fundamentally	Our audit procedures focused on the IT infrastructure and applications relevant to financial reporting of the Company included following: <ul style="list-style-type: none">Tested the design and operating effectiveness of the Company's IT access controls, including audit trail, over

<p>reliant on IT systems and IT controls to process significant transaction volumes.</p> <p>Automated accounting procedures and IT environment controls, which include IT governance, general IT controls over program development and changes, access to programs and data and IT operations, are required to be designed and to operate effectively to ensure reliable financial reporting.</p> <p>Therefore, due to the pervasive nature and complexity of the IT environment, the assessment of the general IT controls and the application controls specific to the accounting and preparation of the financial information is considered to be a key audit matter.</p>	<p>the information systems that are important to financial reporting and various interfaces, configuration and other identified application controls.</p> <ul style="list-style-type: none"> • Tested IT general controls (logical access, changes management and aspects of IT operational controls). This included testing requests for access to systems were reviewed and authorized. • Tested the Company's periodic review of access rights. Also tested requests of changes to systems for approval and authorization. • In addition to the above, tested the design and operating effectiveness of certain automated controls that were considered as key internal controls. • Tested the design and operating effectiveness of compensating controls in case deficiencies were identified and, where necessary, extended the scope of our substantive audit procedures.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Director's report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements for the financial year ended March 31, 2025 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report, to the extent applicable, that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - (c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;
 - (d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;
 - (e) On the basis of the written representations received from the directors as on March 31, 2025 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2025 from being appointed as a director in terms of Section 164 (2) of the Act;
 - (f) With respect to the adequacy of the internal financial controls with reference to these financial statements and the operating effectiveness of such controls, refer to our separate Report in "Annexure 2" to this report;
 - (g) In our opinion, the managerial remuneration for the year ended March 31, 2025 has been paid / provided by the Company to its directors in accordance with the provisions of section 197 read with Schedule V to the Act;
 - (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:
 - i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 41 to the financial statements;
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
 - iv. a) The management has represented that, to the best of its knowledge and belief, as disclosed in the note 62 (A) to the financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

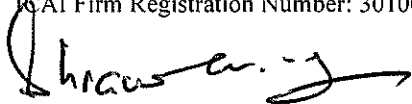

- b) The management has represented that, to the best of its knowledge and belief, as disclosed in the note 62 (B) to the financial statements, no funds have been received by the Company from any person(s) or entity(ies), including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and
- c) Based on such audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.
- v. The interim dividend declared and paid by the Company during the year and until the date of this audit report is in accordance with section 123 of the Act.
- vi. Based on our examination which included test checks, the Company has used accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software (refer Note 65 to the financial statements). Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with. Additionally, the audit trail of prior year has been preserved by the Company as per the statutory requirements for records.

ANNEXURE 1 REFERRED TO IN PARAGRAPH 1 UNDER THE HEADING “REPORT ON OTHER LEGAL AND REGULATORY REQUIRMENTS” OF OUR REPORT OF EVEN DATE**Re: Nuvama Wealth and Investment Limited (“the Company”)**

In terms of the information and explanations sought by us and given by the company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that:

- (i)(a)(A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment.
- (i)(a)(B) The Company has maintained proper records showing full particulars of intangibles assets.
- (i)(b) Property, Plant and Equipment have been physically verified by the management during the year and no material discrepancies were identified on such verification.
- (i)(c) There is no immovable property (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee), held by the Company and accordingly, the requirement to report on clause 3(i)(c) of the Order is not applicable to the Company.
- (i)(d) The Company has not revalued its Property, Plant and Equipment (including Right of use assets) or intangible assets during the year ended March 31, 2025.
- (i)(e) There are no proceedings initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.
- (ii)(a) The Company’s business does not require maintenance of inventories and, accordingly, the requirement to report on clause 3(ii)(a) of the Order is not applicable to the Company.
- (ii)(b) As disclosed in note 18 to the financial statements, the Company has been sanctioned working capital limits in excess of Rs. five crores in aggregate from banks during the year on the basis of security of current assets of the Company. Based on the records examined by us in the normal course of audit of the financial statements, the quarterly returns/statements filed by the Company with such banks are in agreement with the unaudited/audited books of accounts of the Company.
- (iii)(a) During the year the Company has provided loans, guarantees, advances in the nature of loans to companies or other parties as follows:

Particulars	Rs. in million			
	Guarantees	Security	Loans	Advances in nature of loans
Aggregate amount granted/ provided during the year - Companies or Other parties	NA	NA	2,30,396.28	NA
Balance outstanding as at balance sheet date* - Companies or Other parties	NA	NA	14,325.85	NA

*Balance outstanding is total outstanding (including unamortized processing fees) as at March 31, 2025

- (iii)(b) During the year the terms and conditions of the grant of all loans to companies or any other parties are not prejudicial to the Company's interest.
- (iii)(c) In respect of loans granted to companies, or other parties, the schedule of repayment of principal and payment of interest has been stipulated and the repayment or receipts are regular except in the following cases:

(Rs. in million)

Name of the Entity	Amount	Due date	Extent of delay	Remarks, if any
Various parties (ESOP loans)	9.54	11-03-2025 to 28-03-2025	3 to 20 days	ESOP Loans has been renewed or repaid after March 31, 2025 as per original loan agreements entered into with the borrower.

- (iii)(d) There are no amounts of loans granted to companies or any other parties which are overdue for more than ninety days.
- (iii)(e) There were no loans or advance in the nature of loan granted to companies, firms, Limited Liability Partnerships or any other parties which was fallen due during the year, that have been renewed or extended or fresh loans granted to settle the overdues of existing loans given to the same parties.
- (iii)(f) During the year, the Company has granted loans or advances in the nature of loans, either repayable on demand or without specifying any terms or period of repayment to companies, firms, Limited Liability Partnerships or any other parties as stated below and none of these are granted to promoters or related parties as defined in clause (76) of section 2 of the Companies Act, 2013.

(Rs. in million)

Particulars	All Parties
Aggregate amount of loans/ advances in nature of loans	
- Repayable on demand	11,583.52
Percentage of loans/ advances in nature of loans to the total loans	5.03%

- (iv) The Company has not advanced loans to directors / to a Company in which the director is interested to which provisions of section 185 of the Companies Act 2013 apply and hence not commented upon. Further, according to the information and explanations given to us, provisions of sections 186 of the Companies Act, 2013 in respect of loans, investments, guarantees and security have been complied with by the Company.
- (v) In respect of deposits accepted or amounts which are deemed to be deposits, directives issued by the Reserve Bank of India and the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act, 2013, and the rules made there under, to the extent applicable, have been complied with. We are informed by the management that no order has been passed by the Company Law Board, National Company Law Tribunal or Reserve Bank of India or any Court or any other Tribunal.
- (vi) The Central Government has not specified the maintenance of cost records under Section 148(1) of the Companies Act, 2013, for the products/ services of the Company.
- (vii)(a) Undisputed statutory dues including goods and services tax, provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of custom, duty of excise, value added tax, cess and other statutory dues have generally been regularly deposited with the appropriate authorities. According to the information and explanations given to us and based on audit procedures performed by us, no undisputed amounts payable in respect of these statutory dues were outstanding, at the year end, for a period of more than six months from the date they became payable.

As informed, the provision of sales tax, duty of customs, duty of excise, wealth tax and value added tax are currently not applicable to the Company.

- (vii)(b) There are no dues of goods and services tax, provident fund, employees' state insurance, income tax, service tax, cess and other statutory dues which have not been deposited on account of any dispute. The dues outstanding in respect of income tax and goods and service tax on account of dispute, are as follows:

(Rs. in million)

Name of Statute	Nature of dues	Amount	Period to which the amount relates	Forum where dispute is pending
Income-tax Act, 1961	Income-tax	13.98	FY 2012-13	CIT(A)
Income-tax Act, 1961	Income-tax	1.74	FY 2016-17	CIT(A)
Income-tax Act, 1961	Income-tax	56.71	FY 2022-23	CIT(A)
Goods and Service Tax Act, 2017	GST (Delhi)	19.2	FY 2018-19*	Appellate Authority – Delhi
Goods and Service Tax Act, 2017	GST (Raipur)	0.63	FY 2019-20*	Appellate Authority – Raipur
Goods and Service Tax Act, 2017	GST (Delhi)	0.50	FY 2019-20*	Appellate Authority – Delhi
Goods and Service Tax Act, 2017	GST (Uttar Pradesh)	1.03	FY 2019-20*	Appellate Authority – Uttar Pradesh
Goods and Service Tax Act, 2017	GST (West Bengal)	0.10	FY 2020-21*	Appellate Authority – West Bengal
Goods and Service Tax Act, 2017	GST (Telangana)	1.27	FY 2020-21*	Appellate Authority – Telangana
Goods and Service Tax Act, 2017	Goods and Service Tax	3.53	Jul'17 to Mar'22	Palghar Commissionerate

As informed, the provision of sales tax, duty of customs, duty of excise, wealth tax and value added tax are currently not applicable to the Company.

*During the year/previous years, the Company has deposited Rs. 1.08 million under protest in connection with a dispute with GST authorities.

- (viii) The Company has not surrendered or disclosed any transaction, previously unrecorded in the books of account, in the tax assessments under the Income Tax Act, 1961 as income during the year. Accordingly, the requirement to report on clause 3(viii) of the Order is not applicable to the Company.
- (ix)(a) The Company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender.
- (ix)(b) The Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.
- (ix)(c) Term loans were applied for the purpose for which the loans were obtained.
- (ix)(d) On an overall examination of the financial statements of the Company, no funds raised on short-term basis have been used for long-term purposes by the Company.
- (ix)(e) The Company does not have any subsidiary, associate or joint venture. Accordingly, the requirement to report on clause 3(ix)(e) of the Order is not applicable to the Company.
- (ix)(f) The Company does not have any subsidiary, associate or joint venture. Accordingly, the requirement to report on Clause 3(ix)(f) of the Order is not applicable to the Company.

- (x)(a) The Company has not raised any money during the year by way of initial public offer / further public offer (including debt instruments) hence, the requirement to report on clause 3(x)(a) of the Order is not applicable to the Company.
- (x)(b) The Company has not made any preferential allotment or private placement of shares /fully or partially or optionally convertible debentures during the year under audit and hence, the requirement to report on clause 3(x)(b) of the Order is not applicable to the Company.
- (xi)(a) No fraud by the Company or no fraud on the Company has been noticed or reported during the year.
- (xi)(b) During the year, no report under sub-section (12) of section 143 of the Companies Act, 2013 has been filed by cost auditor/ secretarial auditor or by us in Form ADT – 4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.
- (xi)(c) We have taken into consideration the whistle blower complaint received by the Company during the year while determining the nature, timing and extent of audit procedures.
- (xii)(a) The Company is not a nidhi Company as per the provisions of the Companies Act, 2013. Therefore, the requirement to report on clause 3(xii)(a) of the Order is not applicable to the Company.
- (xii)(b) The Company is not a nidhi company as per the provisions of the Companies Act, 2013. Therefore, the requirement to report on clause 3(xii)(b) of the Order is not applicable to the Company.
- (xii)(c) The Company is not a nidhi company as per the provisions of the Companies Act, 2013. Therefore, the requirement to report on clause 3(xii)(c) of the Order is not applicable to the Company.
- (xiii) According to the information and explanations given by the management and audit procedures performed, transactions with the related parties are in compliance with section 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.
- (xiv)(a) The Company has an internal audit system commensurate with the size and nature of its business.
- (xiv)(b) The internal audit reports of the Company issued till the date of the audit report, for the period under audit have been considered by us.
- (xv) The Company has not entered into any non-cash transactions with its directors or persons connected with its directors and hence requirement to report on clause 3(xv) of the Order is not applicable to the Company.
- (xvi)(a) The provisions of section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934) are not applicable to the Company. Accordingly, the requirement to report on clause (xvi)(a) of the Order is not applicable to the Company.
- (xvi)(b) The Company is not engaged in any Non-Banking Financial or Housing Finance activities. Accordingly, the requirement to report on clause (xvi)(b) of the Order is not applicable to the Company.
- (xvi)(c) The Company is not a Core Investment Company as defined in the regulations made by Reserve Bank of India. Accordingly, the requirement to report on clause 3(xvi) of the Order is not applicable to the Company.
- (xvi)(d) There is no Core Investment Company as a part of the Group as at March 31, 2025, hence, the requirement to report on clause 3(xvi) of the Order is not applicable to the Company.
- xvii) The Company has not incurred cash losses in the current financial year and in the immediately preceding financial year respectively.

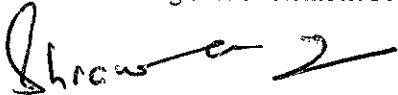

- (xviii) There has been no resignation of the statutory auditors during the year and accordingly requirement to report on Clause 3(xviii) of the Order is not applicable to the Company.
- (xix) On the basis of the financial ratios disclosed in note 50 (a) to the financial statements, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx)(a) In respect of other than ongoing projects, there are no unspent amounts that are required to be transferred to a fund specified in Schedule VII of the Companies Act (the Act), in compliance with second proviso to sub section 5 of section 135 of the Act. This matter has been disclosed in note 34 (b) to the financial statements.
- (xx)(b) There are no unspent amounts in respect of ongoing projects, that are required to be transferred to a special account in compliance of provision of sub section (6) of section 135 of Companies Act. This matter has been disclosed in note 34 (b) to the financial statements.

ANNEXURE 2 TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF NUVAMA WEALTH AND INVESTMENT LIMITED**Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls with reference to financial statements of Nuvama Wealth and Investment Limited ("the Company") as of March 31, 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to these financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to these financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these financial statements.

Meaning of Internal Financial Controls with Reference to these Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of

unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

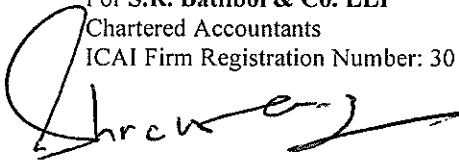

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

Notes:

a) Securities premium

Securities premium reserve is used to record the premium on issue of shares. The reserve can be utilised only for limited purposes in accordance with the provisions of the Companies Act, 2013.

b) Deemed capital contribution - ESOP

Deemed capital contribution relates to share options granted to eligible employees of the Company by Edelweiss Financial Services Limited ('EFSL') being erstwhile Ultimate Parent Company, under its employee share option plan.

c) Debenture Redemption Reserve

Debenture Redemption Reserve represents reserves created as per the Companies Act, 2013 w.r.t. outstanding redeemable debentures out of free reserves. The amounts credited to the Debenture Redemption Reserve may not be utilised except to redeem debentures. On redemption of debentures, the amount will be transferred from Debenture Redemption Reserve to retained earnings.

d) Retained earnings

Retained earnings comprises of the Company's undistributed earnings after taxes and dividend distribution.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.1 Corporate Information:

Nuvama Wealth and Investment Limited ("the Company") was incorporated on February 7, 2008. The Company is a 100% subsidiary of Nuvama Wealth Management Limited. PAGAC Ecstasy Pte. Limited is the Ultimate Holding Company of the Company. The registered office is located at 8th Floor, 801-804, Wing A, Building No. 3, Inspire BKC, G Block, Bandra Kurla Complex, Bandra East, Mumbai 400051.

The Company is registered as a trading member with National Stock Exchange of India Limited ('NSEIL'), Bombay Stock Exchange Limited ('BSE') and Metropolitan Stock Exchange of India Limited ('MSEI'), Multi Commodity Exchange of India Limited ('MCX'), National Commodity and Derivatives Exchange Limited ('NCDEX') and provides broking services to the clients. The Company is also registered as Depository Participant with National Securities Depository Limited ('NSDL'), Central Depository Services (India) Limited ('CDSL') and is also registered as Repository Participant with National E-Repository Limited ('NERL') and Countrywide Commodity Repository Limited ('CCRL') (formally known as CDSL Commodity Repository Limited). The Company is registered as Research Analyst with Securities and Exchange Board of India ('SEBI') and corporate agent (Composite) with Insurance Regulatory and Development Authority of India ('IRDAI'). The Company is also a distributor for various financial products such as Mutual Funds, Bonds, Debentures, Portfolio Management Services ('PMS') and Alternative Investment fund ('AIF') etc.

1.2 Basis of preparation of financial statements

The financial statements of the Company has been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time). These financial statements have been approved by the Board of Directors of the Company on May 27, 2025.

These financial statements have been prepared on a historical cost basis, except for certain financial instruments such as financial asset measured at fair value through other comprehensive income (FVOCI) instruments, derivative financial instruments, and other financial assets held for trading, which have been measured at fair value through profit or loss (FVTPL). The financial statements are presented in Indian Rupees (Rs.) in millions, except when otherwise indicated.

1.3 Presentation of financial statements

The Company presents its Balance sheet in order of liquidity in compliance with the Division III of the Schedule III to the Companies Act, 2013. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in note 39.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Company and or its counterparties

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.3 Presentation of financial statements (Continued)

Derivative assets and liabilities with master netting arrangements [e.g. ISDAs (International Swaps and Derivatives Association)] are only presented net when they satisfy the eligibility of netting for all of the above criteria and not just in the event of default.

Material accounting policies

1.4 Revenue recognition

1.4.1 Revenue from contract with customer

Revenue is measured at transaction price i.e. the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to the customer, excluding amounts collected on behalf of third parties. The Company consider the terms of the contracts and its customary business practices to determine the transaction price. Where the consideration promised is variable, the Company excludes the estimates of variable consideration that are constrained. The Company applies the five-step approach for recognition of revenue:

- i) Identification of contract(s) with customers;
- ii) Identification of the separate performance obligations in the contract;
- iii) Determination of transaction price;
- iv) Allocation of transaction price to the separate performance obligations; and
- v) Recognition of revenue when (or as) each performance obligation is satisfied

The Company recognises revenue from the following sources:

- a. Brokerage income is recognised as per contracted rates at the point in time when transaction's performance obligation is satisfied on behalf of the customers on the trade date. Subscription based income is recognised when the performance obligation has been satisfied.
- b. Depository services income are accounted as follows:
Annual Maintenance Charges are accounted for over the period of the performance obligation.
Transaction charges is recognised point in time when the performance obligation is satisfied.
- c. Fee income including referral fees and commission income is accounted on an accrual basis as per Ind AS 115 in accordance with the terms and contracts entered with the client.
- d. Commissions from distribution of financial products are recognised upon allotment of the securities to the applicant and upon successful log in of application alongwith payment of initial contribution.
- e. Delayed payment charges (Interest on late payments) are accounted at a point in time of default and on certainty of realisation.
- f. Research services fee income is accounted when there is reasonable certainty as to its receipts.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.4 Revenue recognition (Continued)

1.4.2 Interest income:

Interest income on a financial asset at amortised cost is recognised on a time proportion basis taking into account the amount outstanding and the effective interest rate ('EIR'). The EIR is the rate that exactly discounts estimated future cash flows of the financial assets through the expected life of the financial asset or, where appropriate, a shorter period, to the net carrying amount of the financial instrument. The internal rate of return on financial assets after netting off the fee received and cost incurred approximates the effective interest rate method of return for the financial asset. The future cash flows are estimated taking into account all the contractual terms of the instrument.

The interest income is calculated by applying the EIR to the gross carrying amount of non-credit impaired financial assets (i.e. at the amortised cost of the financial asset before adjusting for any expected credit loss allowance). For credit-impaired financial assets the interest income is calculated by applying the EIR to the amortised cost of the credit-impaired financial assets (i.e. the gross carrying amount less the allowance for ECLs).

1.4.3 Dividend income:

Dividend income is recognised when the right to receive the dividend is established, it is probable that the economic benefits associated with the dividend will flow to the entity and the amount of the dividend can be measured reliably.

1.5 Financial Instruments

a) Date of recognition

Financial assets and financial liabilities, with the exception of borrowings are initially recognised on the trade date, i.e., the date that the Company becomes a party to the contractual provisions of the instrument. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. The Company recognises borrowings when funds are received by the Company.

b) Initial measurement of financial instruments

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under Ind AS 115. Refer to the accounting policies in section 1.4.1 Revenue from contracts with customers.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.5 Financial Instruments (*Continued*)

c) Day 1 profit or loss

When the transaction price of the financial instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Company recognises the difference between the transaction price and fair value in net gain on fair value changes. In those cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognised in profit or loss when the inputs become observable, or when the instrument is derecognised.

1.6 Classification of financial instruments

The Company classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- **Financial assets carried at amortised cost (AC)**

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The changes in carrying value of financial assets is recognised in profit and loss account.

- **Financial assets at fair value through other comprehensive income (FVTOCI)**

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The changes in fair value of financial assets is recognised in Other Comprehensive Income.

- **Financial assets at fair value through profit or loss [FVTPL]**

A financial asset which is not classified in any of the above categories are measured at FVTPL. The Company measures all financial assets classified as FVTPL at fair value at each reporting date. The changes in fair value of financial assets is recognised in Profit and loss account.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.7 Financial assets and financial liabilities

a) Amortized cost and Effective interest method (EIR)

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial instruments other than purchased or originated credit-impaired financial assets, the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortised cost of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. On the other hand, the gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

b) Financial assets held for trading

The Company classifies financial assets as held for trading when they have been purchased or issued primarily for short-term profit making through trading activities or form part of a portfolio of financial instruments that are managed together, for which there evidence of a recent pattern of short-term profit is taking. Held-for-trading assets and liabilities are recorded and measured in the balance sheet at fair value.

c) Financial assets at fair value through profit or loss

Financial assets and financial liabilities in this category are those that are not held for trading and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under Ind AS 109. Management only designates an instrument at FVTPL upon initial recognition when one of the following criteria are met. Such designation is determined on an instrument by instrument basis.

- The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis; or
- The liabilities are part of a group of financial liabilities, which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; or
- The liabilities containing one or more embedded derivatives, unless they do not significantly modify the cash flows that would otherwise be required by the contract, or it is clear with little or no analysis when a similar instrument is first considered that separation of the embedded derivative(s) is prohibited.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.7 Financial assets and financial liabilities (Continued)

Financial assets at fair value through profit or loss (Continued)

Financial assets and financial liabilities at FVTPL are recorded in the balance sheet at fair value. Changes in fair value are recorded in profit and loss with the exception of movements in fair value of liabilities designated at FVTPL due to changes in the Company's own credit risk. Such changes in fair value are recorded in the own credit reserve through OCI and do not get recycled to the profit or loss. Interest earned or incurred on instruments designated at FVTPL is accrued in interest income or finance cost, respectively, using the EIR, taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument. Interest earned on assets mandatorily required to be measured at FVTPL is recorded using contractual interest rate.

d) Financial liabilities

All financial liabilities are measured at amortised cost except loan commitments, financial guarantees, and derivative financial liabilities.

e) Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage its exposure to interest rate, market risk.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently re-measured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss.

Embedded derivatives

An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, foreign exchange rate or other variable, provided that, in case of a non-financial variable, it is not specific to a party to the contract.

Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss, unless designated as effective hedging instruments.

f) Debt securities and other borrowed funds

After initial measurement, debt securities issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR.

The Company issues certain non-convertible debentures, the return of which is linked to performance of specified indices over the period of the debenture. Such debentures have a component of an embedded

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.7 Financial assets and financial liabilities (Continued)

derivative which is fair valued at a reporting date. The resultant 'net unrealised loss or gain' on the fair valuation of these embedded derivatives is recognised in the statement of profit and loss. The debt component of such debentures is measured at amortised cost using yield to maturity basis.

g) Financial liabilities and equity instruments

Financial instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Company entity are recognized at the proceeds received.

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

1.8 Reclassification of financial assets and financial liabilities

The Company does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Company acquires, disposes of, or terminates a business line.

1.9 Derecognition of financial instruments

a) Derecognition of financial asset

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The contractual rights to receive cash flows from the financial asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset and the Company has transferred substantially all the risks and rewards of the asset, or the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

If the Company neither transfers nor retains substantially all of the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for the amount it may have to pay.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.9 Derecognition of financial instruments (Continued)

a) Derecognition of financial asset (Continued)

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in OCI is recognised in profit or loss (except for equity instruments measured at FVOCI).

b) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying value of the original financial liability and the new financial liability with modified terms is recognised in profit or loss.

1.10 Impairment of financial assets

The Company records allowance for expected credit loss ('ECL') for all financial assets, other than financial assets held at FVTPL together with loan commitments and financial guarantee contracts. Equity instruments are not subject to impairment.

Simplified approach

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables and Margin Trading Facility ('MTF'). The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime (Expected Credit Loss (ECL) at each reporting date, right from its initial recognition. The Company uses a provision matrix to determine impairment loss allowance on portfolio of its receivables. The provision matrix is based on its historically observed default rates over the expected life of the receivables.

General approach

For ESOP funding, the Company recognises lifetime ECL when there has been a significant increase in credit risk ('SICR') since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the

Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses (12 month ECL). The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12 month ECL represents the portion of lifetime ECL that

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.10 Impairment of financial assets (Continued)

is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

The measurement of ECL is a function of the probability of default (PD) (i.e. it is an estimate of the likelihood of default over a given time horizon), loss given default (LGD) (i.e. the magnitude of the loss if there is a default) and the exposure at default (EAD). The assessment of the PD and LGD is based on historical data adjusted by forward-looking information. As for the EAD, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for loan commitments and financial guarantee contracts, the exposure includes the amount drawn down as at the reporting date, together with any additional amounts expected to be drawn down in the future by default date determined

based on historical trend, the Company's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information.

Company categories its ESOP funding and Receivables towards Margin Trading Funding as follows:

Stage 1 assets:

Stage 1 assets includes financial instruments that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date. For these assets, 12-month ECL (resulting from default events possible within 12 months from reporting date) are recognised.

Stage 2 assets:

Stage 2 Assets includes financial instruments that have had a significant increase in credit risk since initial recognition. For these assets lifetime ECL are recognised.

Stage 3 assets:

Stage 3 for Assets considered credit-impaired the Company recognises the lifetime ECL for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.

For all other financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive, discounted at the original effective interest rate. The Company recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

Significant increase in credit risk

ECL is measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial

recognition. In assessing whether the credit risk of an asset has significantly increased the Company takes into account qualitative and quantitative reasonable and supportable forward-looking information.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.10 Impairment of financial assets (Continued)

Impairment of Financial assets

The measurement of impairment losses across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Company's ECL calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- PD calculation includes historical data, assumptions and expectations of future conditions.
- The Company's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a life-time expected credit loss and the qualitative assessment.
- The segmentation of financial assets when their ECL is assessed on a collective basis.
- Development of ECL models, including the various formulas and the choice of inputs.
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EAD and LGD.
- Selection of forward-looking macro economic scenarios and their probability weightings, to derive the economic inputs into the ECL models

It is Company's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

1.11 Collateral valuation

To mitigate its credit risks on financial assets, the Company seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, and letters of guarantees. Collateral, unless repossessed, is not recorded on the balance sheet. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a periodical basis. However, some collateral, for example, cash or securities relating to margin requirements, is valued daily.

To the extent possible, the Company uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.12 Write off

Financial assets are written off either partially or in their entirety only when the Company has no reasonable expectation of recovery.

1.13 Determination of fair value

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques, as summarised below:

- Level 1 financial instruments - Those where the inputs used in the valuation are unadjusted quoted prices from active markets for identical assets or liabilities that the Company has access to at the measurement date. The Company considers markets as active only if there are sufficient trading activities with regards to the volume and liquidity of the identical assets or liabilities and when there are binding and exercisable price quotes available on the balance sheet date.
- Level 2 financial instruments – Those where the inputs that are used for valuation and are significant, are derived from directly or indirectly observable market data available over the entire period of the instrument's life.
- Level 3 financial instruments – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Company periodically reviews its valuation techniques including the adopted methodologies and model calibrations.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.13 Determination of fair value (Continued)

- Therefore, the Company applies various techniques to estimate the credit risk associated with its financial instruments measured at fair value, which include a portfolio-based approach that estimates the expected net exposure per counterparty over the full lifetime of the individual assets, in order to reflect the credit risk of the individual counterparties for non-collateralised financial instruments.

The Company evaluates the levelling at each reporting period on an instrument-by-instrument basis and reclassifies instruments when necessary based on the facts at the end of the reporting period.

1.14 Leases

Company as a lessee:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right of use assets representing the right of use the underlying assets.

Right of Use Asset

The Company recognizes right of use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right of use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right of use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right of use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

Lease Liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.14 Leases (Continued)

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

Incremental borrowing rate

The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate ('IBR') to measure lease liabilities. Incremental borrowing rate is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right of use asset in a similar economic environment.

Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset is classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

1.15 Earnings per share

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 - Earnings Per Share. Basic earnings per share is computed by dividing the net profit after tax attributable to the equity shareholders for the year by the weighted average number of equity shares outstanding for the year.

For the purpose of EPS, the potential ordinary shares that would be issued on conversion are included in the weighted average number of ordinary shares used in the calculation of basic EPS (and, therefore, also diluted EPS) from the date of issue of the instrument, since their issue is solely dependent on the passage of time.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.15 Earnings per share (Continued)

Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue equity shares were exercised or converted during the year. Diluted earnings per share is computed by dividing the net profit after tax attributable to the equity shareholders for the year by weighted average number of equity shares considered for deriving basic earnings per share and weighted average number of equity shares that could have been issued upon conversion of all potential equity shares.

1.16 Foreign currency transactions

The financial statements are presented in Indian Rupees which is also functional currency of the Company. Transactions in currencies other than Indian Rupees (i.e. foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise.

The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

1.17 Retirement and other employee benefit

Provident fund and national pension scheme

The Company contributes to a recognised provident fund and national pension scheme which is a defined contribution scheme. The contributions are accounted for on an accrual basis and recognised in the statement of profit and loss.

Gratuity

The Company's gratuity scheme is a defined benefit plan. The Company's net obligation in respect of the gratuity benefit scheme is calculated by estimating the amount of future benefit that the employees have earned in return for their service in the current and prior periods, that benefit is discounted to determine its present value, and the fair value of any plan assets, if any, is deducted.

The present value of the obligation under such benefit plan is determined based on independent actuarial valuation using the Projected Unit Credit Method.

Benefits in respect of gratuity are funded with an Insurance Company approved by Insurance Regulatory and Development Authority (IRDA).

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.17 Retirement and other employee benefit (Continued)

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur.

Remeasurements are not reclassified to profit or loss in subsequent periods.

Compensated Absences

The eligible employees of the Company are permitted to carry forward certain number of their annual leave entitlement to subsequent years, subject to a ceiling. The Company recognises the charge in the statement of profit and loss and corresponding liability on such accumulated leave entitlement based on a valuation by an independent actuary. The cost of providing annual leave benefits is determined using the projected unit credit method.

1.18 Share-based payment arrangements

Equity-settled share-based payments to employees by the Holding Company Nuvama Wealth Management Limited ('NWML') and by the erstwhile Ultimate Parent Company Edelweiss Financial Service Limited ('EFSL') are measured by reference to the fair value of the equity instruments at the grant date.

The fair value of Equity-settled share-based payments determined at the grant date is expensed over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. These includes Stock Appreciation Rights (SARs) where the right to receive the difference between the SAR price and the market price of equity shares of the Holding Company on the date of exercise, either by way of cash or issuance of equity shares of the Holding Company, is at the discretion of the Holding Company. These are classified as equity settled share-based transaction.

In cases where the share options granted vest in instalments over the vesting period, the Group treats each instalment as a separate grant, because each instalment has a different vesting period, and hence the fair value of each instalment differs.

1.19 Property, plant and equipment and Right of Use Asset

Property plant and equipment is stated at cost excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value. Changes in the expected useful life are accounted for by changing the amortization period or methodology, as appropriate, and treated as changes in accounting estimates.

Depreciation is recognized so as to write off the cost of assets less their residual values over their useful lives. Depreciation is provided on a written down value basis from the date the asset is ready for its intended use. In respect of assets sold, depreciation is provided upto the date of disposal.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.19 Property, plant and equipment and Right of Use Asset (Continued)

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. The carrying amount of those components which have been separately recognised as assets is derecognised at the time of replacement thereof. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

As per the requirement of Schedule II of the Companies Act, 2013, the Company has evaluated the useful lives of the respective fixed assets which are as per the provisions of Part C of the Schedule II for calculating the depreciation. The estimated useful lives of the property, plant and equipment are as follows:

Nature of assets	Estimated useful life
Furniture and fixtures	10 years
Vehicles	8 years
Office Equipment	5 years
Computers and data processing units – Servers and networks	6 years
Computers - End user devices, such as desktops, laptops, etc.	3 years

For transition to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment and intangible asset recognised as of April 01, 2017 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

Right of use assets are presented together with property and equipment in the statement of financial position – *refer to the accounting policy 1.14*. Right of use assets are depreciated on a straight-line basis at the lower of lease term or useful life.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Leasehold improvements are amortized on a straight-line basis over the estimated useful lives of the assets or the period of lease whichever is earlier.

1.20 Intangible assets

The Company's intangible assets mainly include the value of computer software. An intangible asset is recognized only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Company.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.20 Intangible assets (Continued)

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Intangibles such as software is amortized over a period of upto 5 years based on its estimated useful life.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss.

The estimated useful lives of the intangible assets are as follows:

Nature of assets	Estimated useful life
Computer software	3 - 5 years

Intangible assets under development

Intangible assets under Development includes Software under development.

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Company can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale.
- Its intention to complete and its ability and intention to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete, and the asset is available for use. It is amortised over the period of expected future benefit.

1.21 Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.22 Cash and cash equivalents

Cash at banks and on hand and short-term deposits are with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

1.23 Provisions and other contingent liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

A contingent liability is:

(a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or

(b) a present obligation that arises from past events but is not recognised because:

(i) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or

(ii) the amount of the obligation cannot be measured with sufficient reliability.

Given the subjectivity and uncertainty of determining the probability and amount of losses, the Company takes into account a number of factors including legal advice, the stage of the matter and historical evidence from similar incidents.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognised in the financial statement. However, contingent assets are assessed continually and if it is virtually certain that an economic benefit will arise, the asset and related income are recognised in the period in which the change occurs.

1.24 Income tax expenses

Income tax expense represents the sum of the tax currently payable and deferred tax.

a) Current tax

The tax currently payable is based on taxable profit for the year. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.24 Income tax expenses (*Continued*)

transaction either in OCI or directly in equity. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

b) Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In assessing the recoverability of deferred tax assets, the Company relies on the same forecast assumptions used elsewhere in the financial statements and in other management reports, which, among other things, reflect the potential impact of climate-related development on the business, such as increased cost of production as a result of measures to reduce carbon emission.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised, or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, are recognised subsequently if new information about facts and circumstances change. Acquired deferred tax benefits recognised within the measurement period reduce goodwill related to that acquisition if they result from new information obtained about facts and circumstances existing at the acquisition date. If the carrying amount of goodwill is zero, any remaining deferred tax benefits are recognised in OCI/ capital reserve depending on the principle explained for bargain purchase gains. All other acquired tax benefits realised are recognised in profit or loss.

The Company offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.24 Income tax expenses (Continued)

realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

1.25 Critical accounting judgements and key sources of estimation uncertainty

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

- a) Actuarial assumptions used in calculation of defined benefit plans.
- b) Assumptions used on discounted cash flows, growth rate and discount rate to justify the value of management rights reported under intangible assets.
- c) Assumptions used in estimating the useful lives of tangible assets reported under property, plant and equipment.

Business model assessment

Classification and measurement of financial assets depends on the results of the solely payments of principal and interest ('SPPI') and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of these assets are compensated.

The Company monitors financial assets measured at amortised cost that are derecognised prior to their maturity to understand the quantum, the reason for their disposal and whether the reasons are consistent

with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate, whether there has been a change in business model and so a prospective change to the classification of those assets.

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.25 Critical accounting judgements and key sources of estimation uncertainty (Continued)

Significant increase in credit risk:

ECL is measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial Recognition. In assessing whether the credit risk of an asset has significantly increased the Company takes into account qualitative and quantitative reasonable and supportable forward-looking information.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, as described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Effective interest rate method

The Company's EIR methodology, as explained in accounting policy 1.13 g, recognizes interest income/expense using a rate of return that represents the best estimate of a constant rate of return over the expected behavioral life of financial instruments and recognizes the effect of characteristics of the product life cycle

This estimation, by nature, requires an element of judgement regarding the expected behavioral and life-cycle of the instruments, as well expected changes fee income/expense that are integral parts of the instrument.

Incremental borrowing rate

The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate ('IBR') to measure lease liabilities. Incremental borrowing rate is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment.

Fair value of financial instruments

The fair value of financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.25 Critical accounting judgements and key sources of estimation uncertainty (Continued)

Fair value of financial instruments (Continued)

a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, estimation is required in establishing fair values. Judgements and estimates include considerations of liquidity and model inputs related to items such as credit risk (both own and counterparty), funding value adjustments, correlation and volatility.

Provisions and other contingent liabilities

The Company operates in a regulatory and legal environment that, by nature, has a heightened element of litigation risk inherent to its operations. As a result, it is involved in various litigation, arbitration and regulatory investigations and proceedings in the ordinary course of the Company's business.

When the Company can reliably measure the outflow of economic benefits in relation to a specific case and considers such outflows to be probable, the Company records a provision against the case. Where the probability of outflow is considered to be remote, or probable, but a reliable estimate cannot be made, a contingent liability is disclosed.

Given the subjectivity and uncertainty of determining the probability and amount of losses, the Company takes into account a number of factors including legal advice, the stage of the matter and historical evidence from similar incidents. Significant judgement is required to conclude on these estimates. For detailed note please refer to the accounting policies in section 1.23 "Provisions and other contingent liabilities".

Share based payments

Estimating fair value for share based payment requires determination of the most appropriate valuation model. The estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share based payments transactions are discussed in the accounting policies in section 1.18 "Share-based payment arrangements".

Expected Credit loss ('ECL')

When determining whether the risk of default on a financial instruments has increased significantly since initial recognition, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and credit assessment and including forward looking information. The inputs used and process followed by the Company in determining the ECL have been detailed in the accounting policies in section 1.9 "Impairment of financial assets".

Deferred tax

Deferred tax is recorded on temporary differences between the tax bases of assets and liabilities and their carrying amounts, at the rates that have been enacted or substantively enacted at the reporting date. The ultimate realisation of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences become deductible. The Company considers the expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. The

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.25 Critical accounting judgements and key sources of estimation uncertainty (*Continued*)

amount of the deferred tax assets considered realisable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced. For detailed note please refer to the accounting policies in section 1.24b "Deferred tax".

Defined benefit plans

The cost of the defined benefit plans and the present value of the defined benefit obligation are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. For detailed note please refer to the accounting policies in section 1.17 "Retirement and other employee benefit".

Leases

Ind AS 116 defines a lease term as the non-cancellable period for which the lessee has the right to use an underlying asset including optional periods, when an entity is reasonably certain to exercise an option to extend (or not to terminate) a lease. The Company consider all relevant facts and circumstances that create an economic incentive for the lessee to exercise the option when determining the lease term. The option to extend the lease term are included in the lease term, if it is reasonably certain that the lessee will exercise the option. The Company reassess the option when significant events or changes in circumstances occur that are within the control of the lessee.

1.26 Standards issued and effective:

The Company applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after April 01, 2024. The Company has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

(i) Ind AS 117 Insurance Contracts

The Ministry of Corporate Affairs (MCA) notified the Ind AS 117, Insurance Contracts, vide notification dated August 12, 2024, under the Companies (Indian Accounting Standards) Amendment Rules, 2024, which is effective from annual reporting periods beginning on or after April 01, 2024.

Ind AS 117 Insurance Contracts is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Ind AS 117 replaces Ind AS 104 Insurance Contracts. Ind AS 117 applies to all types of insurance contracts, regardless of the type of entities that issue them as well as to certain guarantees and financial instruments with discretionary participation features; a few scope exceptions will apply. Ind AS 117 is based on a general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

Nuvama Wealth and Investment Limited

Notes to the financial statements

for the year ended March 31, 2025

1.26 Standards issued and effective (Continued):

The application of Ind AS 117 does not have material impact on the Company's separate financial statements as the Company has not entered any contracts in the nature of insurance contracts covered under Ind AS 117.

(ii) Amendments to Ind AS 116 Leases – Lease Liability in a Sale and Leaseback

The MCA notified the Companies (Indian Accounting Standards) Second Amendment Rules, 2024, which amend Ind AS 116, Leases, with respect to Lease Liability in a Sale and Leaseback.

The amendment specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

The amendment is effective for annual reporting periods beginning on or after April 01, 2024 and must be applied retrospectively to sale and leaseback transactions entered into after the date of initial application of Ind AS 116.

The amendments do not have a material impact on the Company's financial statements.

1.27 Standards notified but not yet effective:

There are no standards that are notified and not yet effective as on the date.

Notes:

1) During the year, the Company has not advanced or given loans or invested funds (either borrowed funds or share premium or any other sources or kind of funds) to any other person(s) or entity(ies), including foreign entities (Intermediaries) with the understanding (whether recorded in writing or otherwise) that the Intermediary shall:

- (i) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company (Ultimate Beneficiaries); or
- (ii) provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.

2) There are no loans due by directors or other officers of the Company or any of them either severally or jointly with any other persons or amounts due by firms or private companies respectively in which any director is a partner or a director or a member.

3) There are no loans or advances in the nature of loans to promoters, directors, KMPs or related parties (as defined under Companies Act, 2013,) either severally or jointly with any other person, that are:

- (a) repayable on demand; or
- (b) without specifying any terms or period of repayment

4) The Company provides ESOP loans to its customers which are secured by the shares issued under ESOP plan. These loans have a tenure of 12 months from the date of disbursement further extendable for a period upto 12 months as agreed between both the parties, provided the interest dues have been fully serviced by the customer.

5) The Company provides Margin trading facility to its customers which are secured against the shares taken by the customers. This facility is for 320 days from the date of disbursement.

Total (a + b + c + d)	<u><u>4,139.82</u></u>	<u><u>4,311.73</u></u>

A Nature and purpose of reserves

a) Securities premium

Securities premium reserve is used to record the premium on issue of shares. The reserve can be utilised only for limited purposes in accordance with the provisions of the Companies Act, 2013.

b) Debenture Redemption Reserve

Debenture redemption reserve represents reserves created as per the Companies Act, 2013 w.r.t. outstanding redeemable debentures out of free reserves. The amounts credited to the debenture redemption reserve may not be utilised except to redeem debentures. On redemption of debentures, the amount will be transferred from debenture redemption reserve to retained earnings.

c) Deemed capital contribution - ESOP

Deemed capital contribution relates to share options granted to eligible employees of the Company by Edelweiss Financial Services Limited ('EFSL') being erstwhile Ultimate Parent Company, under its employee share option plan.

d) Retained earnings

Retained earnings comprises of the Company's undistributed earnings after taxes and dividend distribution.

(Currency : Indian rupees in million)

41 Contingent liabilities, commitments and lease arrangements

a. Legal claims

The Company operates in a regulatory and legal environment. In the ordinary course of business, the Company faces claims and assertions by various parties. The Company assesses such claims and assertions and monitors the legal environment on an ongoing basis, with the assistance of external legal counsel, wherever necessary. The Company records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in the financial statements, if material. For potential losses that are considered possible, but not probable, the Company provides disclosure in the financial statements but does not record a liability in its accounts unless the loss becomes probable. The aggregate value of claim against the Company is Rs. 14.13 million (P.Y. Rs. 29.88 million).

b. Contingent liabilities

Particulars	March 31, 2025	March 31, 2024
(a) Claims against the Company not acknowledged as debt	14.13	29.88
(b) Taxation matters in respect of ESOP and others	90.49	-

Note: During the year ended March 31, 2025, the Holding Company has received an order for the assessment year 2018-2019 from the Income tax department disallowing ESOP perquisite value. Considering the same, the Company has disclosed Rs. 23.01 million as a contingent liability for the assessment year 2017-18 being the tax effect on such ESOP perquisite value deduction claimed in the return of Income and for which the provision for taxation for assessment year 2017-18 has been adjusted in the books. In respect of assessment years other than above, on a conservative basis, the Company has not claimed any deduction while making tax provision in the books of account and hence there is no contingent liability for such assessment years.

c. Leases

The Company has entered into commercial leases for premises.

i) Movement of Right of Use assets - leasehold premises

Particulars	March 31, 2025	March 31, 2024
Opening Balance	701.56	391.82
Addition/ (disposal) during the year	420.43	503.97
Less: Amortisation on Right of Use - leasehold premises	(250.76)	(194.23)
Closing Balance	871.23	701.56

ii) Movement of Lease liabilities

Particulars	March 31, 2025	March 31, 2024
Opening Balance	777.79	465.34
Addition/ (disposal) during the year	408.81	502.79
Add: Accretion of interest	86.56	56.53
Less: Payment during the year	(308.32)	(246.87)
Closing Balance	964.84	777.79

iii) Short term lease commitments

Short term lease payments for the year as follows:

Particulars	March 31, 2025	March 31, 2024
Within one year	7.48	7.93
Total	7.48	7.93

iv) Other disclosures

Particulars	March 31, 2025 Years/ Amount	March 31, 2024 Years / Amount
The leases have an average life of between (in years)	6.15	6.56
The total lease payment for the year (amount)	490.07	404.32
Lease rent expenses recognised in statement of profit and loss for short term lease (amount)	181.74	157.45

43 Capital management

The primary objective of the Company's capital management policy is to ensure that the Company maintains healthy capital ratios in order to support its business and to maximise shareholder value.

The Company manages its capital structure and makes adjustments to it according to changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue new shares or raise/ repay debt. No changes have been made to the objectives, policies and processes from the previous years. However, they are under constant review by the Board.

In addition to above, the Company is required to maintain minimum net worth as prescribed by regulatory authorities. The management ensures that this is complied.

44 Risk Management

Introduction and risk profile

Risk is an inherent part of Company's business activities. When the Company provides broking services, extends a loan, buys or sells securities in market, or offers other products or services, the Company takes on some degree of risk. The Company's overall objective is to manage its businesses, and the associated risks, in a manner that balances serving the interests of its customers and investors and protects the safety and soundness of the Company.

The Company believes that effective risk management requires:

1. Acceptance of responsibility, including identification and escalation of risk issues, by all individuals within the Company;
2. Ownership of risk identification, assessment, data and management within each of the lines of business and Corporate; and
3. Firmwide structures for risk governance

The Company strives for continual improvement through efforts to enhance controls, ongoing employee training and development and other measures.

Risk management structure

The Company has a well-defined risk management policy framework for risk identification, assessment and control to effectively manage risks associated with the various business activities. The risk function is monitored by central risk group that is responsible for managing the risk arising out of various business activities.

Nuvama Wealth and Investment Limited

Notes to the financial statements (Continued)

(Currency: Indian rupees in million)

44 Risk Management (Continued)

Risk management structure (Continued)

The Company's risk management policy ensures that the margin requirements are able to withstand market volatility and scenarios of sharply declining prices. The Company centralises risk monitoring systems to monitor client's credit exposure which is in addition to the monitoring undertaken by the respective businesses.

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board has established a Risk Management Committee, which is responsible for developing and monitoring the Company's risk management policies. The Committee holds regular meetings and report to board on its activities.

The audit committee oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

Risk mitigation and risk culture

The Company's business processes ensure complete independence of functions and a segregation of responsibilities. Credit control processes, centralised operations unit, independent audit unit for checking compliance with the prescribed policies and approving loans at transaction level as well as our risk management processes and policies allow layers of multiple checks and verifications. Our key business processes are regularly monitored by the head of our business or operations. Our approval and administration procedures, collection and enforcement procedures are designed to minimise delinquencies and maximise recoveries.

At all levels of the Company's operations, specifically tailored risk reports are prepared and distributed in order to ensure that all business divisions have access to extensive, necessary and up-to-date information.

It is the Company's policy that regular briefing is given to the Board of Directors and all other relevant members of the Company in the utilisation of limits, proprietary investments and liquidity, plus any other risk developments.

It is the Company's policy to ensure that a robust risk awareness is embedded in its organisational risk culture. Employees are expected to take ownership and be accountable for the risks the Company is exposed to. The Company's continuous training and development emphasises that employees are made aware of the Company's risk appetite and they are supported in their roles and responsibilities to monitor and keep their exposure to risk within the Company's risk appetite limits. Compliance breaches and internal audit findings are important elements of employees' annual ratings and remuneration reviews.

44 Risk Management (Continued)

Risk mitigation and risk culture (Continued)

Types of Risks

Risks	Arising from	Measurement, monitoring and management of risk
Credit risk: Credit risk is the risk of financial loss if a customer or counterparty fails to meet an obligation under a contract.	Arises principally from financing, dealing in Corporate Bonds, investments in Mutual Fund, Equity and other such products.	Measured as the amount that could be lost if a customer or counterparty fails to make repayments; Monitored using various internal risk management measures and within limits approved by individuals within a framework of delegated authorities; and Managed through a robust risk control framework, which outlines clear and consistent policies, principles and guidance for risk managers.
Liquidity risk: Liquidity risk is the risk that we do not have sufficient financial resources to meet our obligations as they fall due or that we can only do so at an excessive cost.	Liquidity risk arises from mismatches in the timing of cash flows.	Measured using a range of metrics, including Asset Liability mismatch, Debt Equity Ratio Regular monitoring of funding levels to ensure to meet the requirement for Business and maturity of our liabilities. Maintain diverse sources of funding and liquid assets to facilitate flexibility in meeting liquidity requirements of the Company.
Market risk: Market risk is the risk that movements in market factors, such as Interest rates, equity prices and Index prices etc will reduce our income or the value of our portfolios.	Exposure to market risk is separated into two portfolios: trading and non-trading.	Measured using sensitivities, detailed picture of potential gains and losses for a range of market movements and scenarios. Monitored using measures, including the sensitivity of net interest income. Managed using risk limits approved by the risk management committee.

Nuvama Wealth and Investment Limited

44 Risk Management (Continued)

Risk mitigation and risk culture (Continued)

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's Trade receivables and Loans (which includes comprises of Margin Trading Facility ('MTF') and Employee Stock Option Plan ('ESOP') Loans). The Company has adopted a policy of dealing with creditworthy counterparties and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. In case the loans are to be restructured, similar credit assessment process is followed by the Company.

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer and available collateral.

The Company manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties/Groups and by monitoring exposures in relation to such limits.

Credit quality of a customer is assessed based on its credit worthiness and historical dealings with the Company and market intelligence. Outstanding customer receivables are regularly monitored. The credit quality review process aims to allow the Company to assess the potential loss as a result of the risks to which it is exposed and take corrective actions.

Trade receivables including Margin Trading Facility ('MTF')

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables including Margin Trading Facility ('MTF'). The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime Expected Credit Loss (ECL) at each reporting date, right from its initial recognition.

The ageing wise trade receivable used to assess credit risk is as follows:

Bucketing	March 31, 2025	March 31, 2024
(Ageing)	Carrying value	Carrying value
0 – 30 Days	4,514.98	4,261.37
31 – 60 Days	147.90	104.66
61 – 90 Days	226.08	23.75
More than 90 Days	188.22	170.80
Less: Impairment allowance	(230.95)	(163.67)
Total	4,846.23	4,396.91

Nuvama Wealth and Investment Limited

Notes to the financial statements (Continued)

(Currency: Indian rupees in million)

44 Risk Management (Continued)

Credit risk (Continued)

Employee Stock Option Plan ('ESOP') Loans

Impairment assessment:

The Company applies the expected credit loss model for recognising impairment loss. The expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

The expected credit loss is a product of exposure at default, probability of default and loss given default. The Company has devised an internal model to evaluate the probability of default and loss given default based on the parameters set out in Ind AS. Accordingly, the loans are classified into various stages as follows:

Internal rating grade	Internal grading description	Stages
Performing		
High grade	0 dpd and 1 to 30 dpd	Stage I
Standard grade	31 to 90 dpd	Stage II
Non-performing		
Individually impaired	90+ dpd	Stage III

Credit loss is the difference between all contractual cash flows that are due to an entity in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. Expected Credit Loss (ECL) computation is not driven by any single methodology, however methodology and approach used must reflect the following:

- 1) An unbiased and probability weighted amount that evaluates a range of possible outcomes
- 2) Reasonable and supportable information that is available without undue cost and effort at the reporting date about past events, current conditions and forecasts of future economic conditions;
- 3) Time value of money

While the time value of money element is currently being factored into ECL measurement while discounting cash flows by the Effective Interest Rate (EIR), the objective of developing a macro economic model using exogenous macro economic variables (MEVs) is to address the first two requirements. This has been achieved by using the model output to adjust the PD risk component in order to make it forward looking and probability-weighted.

Significant increase in Credit Risk (SICR)

The Company considers a financial instrument defaulted, classified as Stage 3 (credit-impaired) for ECL calculations, in all cases when the borrower becomes 90 days past due. Classification of assets from stage 1 to stage 2 has been carried out based on SICR criterion. Accounts which are

Nuvama Wealth and Investment Limited

Notes to the financial statements (Continued)

(Currency: Indian rupees in million)

44 Risk Management (Continued)

Employee Stock Option Plan ('ESOP') Loans (Continued)

Significant increase in Credit Risk (SICR) (Continued)

more than 30 days past due have been identified as accounts where significant increase in credit risk has been observed. These accounts have been classified as Stage 2 assets. When such events occur, the Company carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate.

Probability of Default (PD)

Probability of default (PD) is an estimate of the likelihood of default over a given time horizon. Since the Company has nil historical default in its portfolio, PD calculation is a challenge basis default history of the Company. Hence stage 1 PD has been considered from from a Discussion Paper on "Introduction of Dynamic Loan loss Provisioning Framework for Banks in India" by RBI in March 2012.

Loss Given Default (LGD)

The LGD represents expected losses on the EAD given the event of default, taking into account, among other attributes, the mitigating effect of collateral value at the time it is expected to be realised and the time value of money. Since the Company is into the business of lending against securities, haircut of 25% is applied on the value of the collateral, based on basel haircut values for corporate securities. The exposure amount that is over and above the collateral (with haircut) is considered as the "Loss Exposure".

$LGD\% = \text{Loss exposure} / \text{EAD}$

Exposure at Default (EAD)

The amount which the borrower will owe to the Company at the time of default is defined as Exposure at Default (EAD). While the drawn credit line reflects the explicit exposure for the Company, there might be variable exposure that may change the EAD. For the current ECL computation exercise, the sum of all outstanding amounts has been taken as the total exposure.

Following table provides information about exposure to credit risk and ECL on Loans:

Bucketing (Stage)	March 31, 2025		March 31, 2024	
	Carrying value	ECL	Carrying value	ECL
Stage 1	14,297.04	2.28	18,085.44	3.73
Stage 2	-	-	-	-
Stage 3	0.98	0.98	0.03	0.03
Total	14,298.02	3.26	18,085.47	3.76

44b Collateral held and other credit enhancements

The tables shows the maximum exposure to credit risk by class of financial asset. That also shows the total fair value of collateral, any surplus collateral (the extent to which the fair value of collateral held is greater than the exposure to which it relates), and the net exposure to credit risk:

As at March 31, 2025	Maximum exposure to credit risk (carrying amount before ECL)	Principal type of collateral
Financial assets		
Loans (Gross)	14,298.02	Securities
Trade receivables (Gross) - Secured	1,387.42	Securities
Trade receivables (Gross) - Unsecured	3,689.76	
Total	19,375.20	
As at March 31, 2024	Maximum exposure to credit risk (carrying amount before ECL)	Principal type of collateral
Financial assets		
Loans (Gross)	18,085.46	Securities
Trade receivables (Gross) - Secured	1,253.63	Securities
Trade receivables (Gross) - Unsecured	3,306.95	
Total	22,646.04	

Collateral information is not applicable to financial assets other than those mentioned above.

44 Risk Management (Continued)

44d Market Risk (Price Risk)

The Company has exposure in quoted equity shares, mutual funds, debt instruments and derivative instruments. Accordingly there is effect on the Company's profitability due to variation in market price as mentioned below.

44d(i) Index Price Risk

Index price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the level of equity and index indices.

As at March 31, 2025

	Increase in basis points	Effect on Profit before tax	Decrease in basis points	Effect on Profit before tax
Embedded derivative	25	0.37	25	(0.37)
Exchange traded derivatives	25	1.21	25	(1.21)

As at March 31, 2024

	Increase in basis points	Effect on Profit before tax	Decrease in basis points	Effect on Profit before tax
Embedded derivative	25	0.98	25	(0.98)
Exchange traded derivatives	25	1.37	25	(1.37)

44d (ii) Equity Price Risk

Equity price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the level of individual investment in equity share and mutual fund prices.

As at March 31, 2025

	Increase in basis points	Effect on Profit before tax	Decrease in basis points	Effect on Profit before tax
Equity shares, mutual funds and Alternate Investment Funds	25	11.74	25	(11.74)

As at March 31, 2024

	Increase in basis points	Effect on Profit before tax	Decrease in basis points	Effect on Profit before tax
Equity shares and mutual funds	25	2.54	25	(2.54)

44d (iii) Interest Rate Risk

The principal risk to which non-trading portfolios are exposed is the risk of loss from fluctuations in the future cash flows or fair values of financial instruments because of a change in market interest rates.

As at March 31, 2025

	Increase in basis points	Effect on Profit before tax	Decrease in basis points	Effect on Profit before tax
Debt instruments	25	3.40	25	(3.40)

As at March 31, 2024

	Increase in basis points	Effect on Profit before tax	Decrease in basis points	Effect on Profit before tax
Debt instruments	25	0.87	25	(0.87)

45 Financial assets available to support future funding

a. Following table sets out availability of assets to support funding:

March 31, 2025	Pledge as collateral	others (refer note 1)	Available as collateral	others (refer note 2)	Total carrying amount
Cash and cash equivalents	-	-	-	587.41	587.41
Bank balances other than cash and cash equivalents	27,168.88	-	-	385.21	27,554.09
Derivative financial instruments	-	862.18	-	-	862.18
Securities held for trading	1,171.15	-	4,882.82	-	6,053.97
Trade receivables (refer note 3)	4,500.00	-	346.23	-	4,846.23
Loans	13,617.70	-	677.06	-	14,294.76
Investments	-	-	142.46	-	142.46
Other financial assets	-	2,070.27	180.19	31.09	2,281.55
Total assets	46,457.73	2,932.45	6,228.76	1,003.71	56,622.65

March 31, 2024	Pledge as collateral	others (refer note 1)	Available as collateral	others (refer note 2)	Total carrying amount
Cash and cash equivalents	-	-	-	907.34	907.34
Bank balances other than cash and cash equivalents	7,555.77	-	-	144.02	7,699.79
Derivative financial instruments	-	1,255.24	-	-	1,255.24
Securities held for trading	833.71	-	530.11	-	1,363.82
Trade receivables (refer note 3)	3,000.00	-	1,396.91	-	4,396.91
Loans	8,316.65	-	9,765.06	-	18,081.71
Investments	-	-	-	-	-
Other financial assets	-	22,964.45	494.16	78.18	23,536.79
Total assets	19,706.13	24,219.69	12,186.24	1,129.54	57,241.60

Note

- 1 Represents assets which are not pledged and the Company believes it is restricted from using to secure funding for legal or other reason.
- 2 Represents assets which are not restricted for use as collateral, but that the Company would not consider readily available to secure funding in the normal course of business.
- 3 Trade receivables pledged as collateral are against undrawn bank facilities.

b. Undrawn borrowing commitments

The Company has undrawn borrowing commitments from banks amounting to Rs. 4,488.10 million as on March 31, 2025 (P.Y. : Rs. 1,985.64 million).

Notes to the financial statements (Continued)

(Currency : Indian rupees in million)

46 Fair Value measurement

a. Valuation principles

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price), regardless of whether that price is directly observable or estimated using a valuation technique. In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques:

Level 1 – valuation technique using quoted market price: financial instruments with quoted prices for identical instruments in active markets that Company can access at the measurement date.

Level 2 – valuation technique using observable inputs: Those where the inputs that are used for valuation and are significant, are derived from directly or indirectly observable market data available over the entire period of the instrument's life.

Level 3 – valuation technique with significant unobservable inputs: Those that include one or more unobservable input that is significant to the measurement as whole.

b. Valuation governance framework

The Company's fair value methodology and the governance over its models includes a number of controls and other procedures to ensure appropriate safeguards are in place to ensure its quality and adequacy. All new product initiatives (including their valuation methodologies) are subject to approvals by various functions of the Company including the risk and finance functions.

Where fair values are determined by reference to externally quoted prices or observable pricing inputs to models, independent price determination or validation is used. For inactive markets, Company sources alternative market information, with greater weight given to information that is considered to be more relevant and reliable.

The responsibility of ongoing measurement resides with the business and product line divisions. However finance department is also responsible for establishing procedures governing valuation and ensuring fair values are in compliance with accounting standards.

c. The following table shows an analysis of financial instruments recorded at fair value by level of the fair value hierarchy

As at March 31, 2025	Level 1	Level 2	Level 3	Total
Assets measured at fair value on a recurring basis				
Derivative financial instruments (refer note 4a)

Nuvama Wealth and Investment Limited (Formerly known as Edelweiss Broking Limited)

Notes to the financial statements (Continued)

(Currency : Indian rupees in million)

46 Fair Value measurement (Continued)

d. Valuation techniques (Continued)

Debt securities:

Whilst most of these instruments are standard fixed rate securities. Fair value of these instruments is derived based on the indicative quotes of price and yields prevailing in the market as at the reporting date. The Company has used quoted price of stock exchange wherever bonds are traded actively.

Government securities:

Government securities are financial instruments issued by sovereign governments and include long term bonds and short-term Treasury bills with fixed or floating rate interest payments. These instruments are generally highly liquid and traded in active markets resulting in a Level 1 classification.

Equity Shares:

The majority of equity shares are actively traded on stock exchanges with readily available active prices on a regular basis. Such instruments are classified as Level 1. Equity shares in non listed entities are initially recognized at transaction price and remeasured at each reporting date at valuation provided by external valuer at instrument level. Such unlisted equity shares are classified at level 2.

Units of Mutual funds and Alternate Investment Funds ('AIF') :

Units of mutual funds are measured based on their published net assets value (NAV), taking into account redemption and/ or other restrictions. Such instruments are also classified as Level 1.

Units held in AIF funds are measured based on their published net asset value (NAV), taking into account redemption and/ or other restrictions. Such instruments are classified as Level 2.

Embedded derivative:

An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative.

The Company uses valuation models which calculate the present value of expected future cash flows, based upon 'no arbitrage' principles. Inputs to valuation models are determined from observable market (Indices) data wherever possible, including prices available from exchanges, dealers, brokers. Company classify these embedded derivative as level 3 instruments

Exchange traded derivatives:

Exchange traded derivatives includes index/stock options, index/stock futures. The Company uses exchange traded prices to value these derivative and classify these instrument as level 1.

e. There have been no transfers between levels during the year ended March 31, 2025 and March 31, 2024.

f. The following table shows a reconciliation of the opening balances and the closing balances for fair value measurements in Level 3 of the fair value hierarchy.

Assets measured at fair value on a recurring basis	Embedded derivatives		
	Assets	Liabilities	Net Balance
As at April 1, 2024	463.02	70.02	393.00
Issuances	7.44	-	7.44
Change in Value of Embedded derivatives	(235.40)	7.51	(242.91)
Settlements	(10.67)	(1.01)	(9.66)
As at March 31, 2025	224.39	76.52	147.87

Assets measured at fair value on a recurring basis	Embedded derivatives		
	Assets	Liabilities	Net Balance
As at April 1, 2023	1,708.08	-	1,708.08
Issuances	169.40	45.03	124.37
Change in Value of Embedded derivatives	(1,414.46)	24.99	(1,439.45)
As at March 31, 2024	463.02	70.02	393.00

46 Fair Value measurement (Continued)

g. Impact on fair value of level 3 financial instrument of changes to key unobservable inputs

The below table summarises the valuation techniques together with the significant unobservable inputs used to calculate the fair value of the Company's Level 3 Instruments i.e. Derivative instruments. The range of values indicates the highest and lowest level input used in the valuation technique and, as such, only reflects the characteristics of the instruments as opposed to the level of uncertainty to their valuation. Relationships between unobservable inputs have not been incorporated in this summary.

Type of Financial Instruments	Fair value of asset as on March 31, 2025	Valuation techniques	Significant unobservable input	Range of estimates for unobservable input	Increase in the unobservable input	Change in fair value	Decrease in the unobservable input	Change in fair value
Embedded derivatives (net)	147.87	Fair value using Black Scholes model or Monte Carlo approach	Nifty level Underlying discount rate	23,638 4.5 % to 6 %	5% increase in Nifty Index curve 1% increase in Risk-adjusted discount rate	71.00 22.30	5% Decrease in Nifty Index curve 1% Decrease in Risk-adjusted discount rate	(120.10) (24.00)
Type of Financial Instruments	Fair value of asset as on March 31, 2024	Valuation techniques	Significant unobservable input	Range of estimates for unobservable input	Increase in the unobservable input	Change in fair value	Decrease in the unobservable input	Change in fair value
Embedded derivatives (net)	393.00	Fair value using Black Scholes model or Monte Carlo approach	Nifty level Underlying discount rate	22,327 4.5 % to 6 %	5% increase in Nifty Index curve 1% increase in Risk-adjusted discount rate	159.40 64.92	5% Decrease in Nifty Index curve 1% Decrease in Risk-adjusted discount rate	(247.83) (72.38)

h. With respect to financial instruments not measured at fair value, their carrying amounts approximates fair value.
